Professional Summary

Full-Stack Software Engineer specializing in React, Node.js, Express, and MongoDB (MERN stack). Experienced in building scalable SaaS and e-commerce applications, designing RESTful APIs, and improving large legacy systems through database optimization, system integrations, and performance improvements.

Technical Skills & CORE Competencies

Full-Stack Development (MERN Architecture): React, Node.js, Express, MongoDB

API & System Design: RESTful APIs, System Integration, Third-Party APIs (Stripe, Shippo, Dynamics)

Data & Databases: SQL, MongoDB, PostgreSQL, MySQL, Database Design & Optimization

Authentication & Security: JWT, OAuth

Cloud & Deployment: GCP, DigitalOcean, Vercel, Render

Testing & CI/CD: Jest, GitHub Actions

Frontend Development: React, Vite, Context API

Tools: Git, GitHub, Postman

Languages: JavaScript (ES6+), SQL, HTML5, CSS3

Professional Experience

Software Engineer (Contract) • Sabi Ventures • Jan 2026 - Feb 2026

- Delivered a Chrome wellness extension with a dashboard for configuring break reminders and tracking usage activity.
- Implemented background notification logic that prompts users at scheduled intervals to encourage movement habits.
- Designed a dashboard interface for managing reminder settings and viewing engagement data.
- Improved system reliability by stabilizing background processes and ensuring consistent notification delivery.

Software Engineer • TripleTen • Apr 2025 - Jan 2026

- Shipped 6+ full-stack applications using React, Node.js, and MongoDB with modular, production-ready architecture.
- Engineered RESTful APIs to support application workflows and maintain consistent data flow across services.
- Integrated Python-generated outputs from data science collaborators into full-stack features for data-driven functionality.
- Worked alongside 2 junior developers to improve code quality, streamline reviews, and speed up feature delivery.

Full Stack Developer • Surplus Sales of Nebraska • Feb 2023 - Jul 2024

- Completed SQL database for 75,000+ product records by defining missing fields and improving data consistency.
- Created APIs linking website, database, and Microsoft Dynamics ERP for real-time synchronization.
- Migrated 120,000+ images from Linux servers to DigitalOcean cloud storage to improve system performance.
- Supported full platform redesign by aligning backend systems with updated frontend architecture.

Selected Projects

Sparkle Bow Shop • Full-Stack E-Commerce System [Github](#) (Frontend) [Github](#) (Backend) | [Demo](#)

- MERN-based e-commerce system supporting product browsing and checkout workflows.
- Shippo shipping integration with Zapier automations connecting Stripe and Wave for order processing.
- REST APIs for product, order, and transaction management with Jest testing for checkout stability.

Tech Stack: Node.js, Express, React, MongoDB, Stripe API, Shippo API, Jest

BudgetBlox • Financial Tracking SaaS [Github](#) | [Demo](#)

- React/Node/MongoDB budgeting application developed with 2 engineering collaborators.
- Python data outputs from data science partners integrated into backend and UI workflows for insights.
- Full-stack feature delivery through iterative development cycles and collaborative reviews.

Tech Stack: React, Node.js, Express, MongoDB, Vite, Context API

Weather Intelligence Application • Data-Processing Engine [Github](#) | [Demo](#)

- MERN application converting real-time weather data into personalized outfit recommendations.
- REST APIs handling ingestion and transformation of external weather data for recommendation logic.
- MongoDB schemas for wardrobe and preference data ensuring consistent full-stack data flow.

Tech Stack: React, Node.js, Express, Google Cloud, OpenWeather API

Education

Software Engineering Certificate • TripleTen • Apr 2025 - Jan 2026

Bachelor of Web Design • Miami International University of Art & Design • Mar 2020 - Jun - 2024

Associate of Arts and Science • Independence University • Aug 2016 - Oct 2018
